EXPERIENCE

Training

- I Completed my full stack development training at Red & White Education from (2023-2025). I'm proficient in programming languages like HTML, CSS, JavaScript, React.js, Bootstrap, and more. Additionally, I'm familiar with UI/UX design, which enhances my ability to create user-friendly and visually appealing applications.

PROJECTS

- **Mate Sneakers Store**
This responsive e-commerce webpage, built with HTML, CSS, and jQuery, highlights products with a modern design and interactive features. It includes a hero section, product recommendations, and a well-organized footer with contact info and links.
- **Modern Blog Layout**
This webpage, built with HTML, CSS, JavaScript, and jQuery, Bootstrap & features a minimalist design with soft pastel colors. It includes a hero section, blog cards, a newsletter, and a contact form, making it ideal for a personal blog or portfolio.
- **Bookstore Manager**
Manage your bookstore effortlessly with an intuitive interface that lets you add, view, edit, or delete books by category. Built using HTML, CSS, Bootstrap, and Node.js, this application ensures seamless CRUD operations for an organized and dynamic experience.
